## N95 MASKS

SKU: RSS- N95

50 pcs per box / 20 boxes per carton  
MOQ - 1 box

### PRODUCT DESCRIPTION

N95 is a disposable particulate respirator that is designed to help provide reliable respiratory protection of at least 95 percent filtration efficiency against certain non-oil based particles. This respirator is designed for use for particles such as those from grinding, sanding, sweeping, sawing, bagging, or other dusty operations. This respirator can also help reduce inhalation exposures to certain airborne biological particles but cannot eliminate the risk of contracting infection, illness, or disease.

## Product Description

This product is used for body temperature detection and spray disinfection for people entering and leaving public areas.

The inductive design, reduce human operation and monitoring, reduce the workload of security personnel, greatly reduce the work risk of high-frequency contact personnel, and effectively avoid cross infection.

The solution is ideal for Hospitals, schools, communities, enterprises and institutions, public transportation, entertainment places, hotels and other public areas.

## Operations

Enter the temperature measurement area, and align the forehead with the infrared sensor. The distance between the forehead and the sensor is 6 inches. Wait for about 3 seconds, and the temperature collection interval happens in 2 seconds.

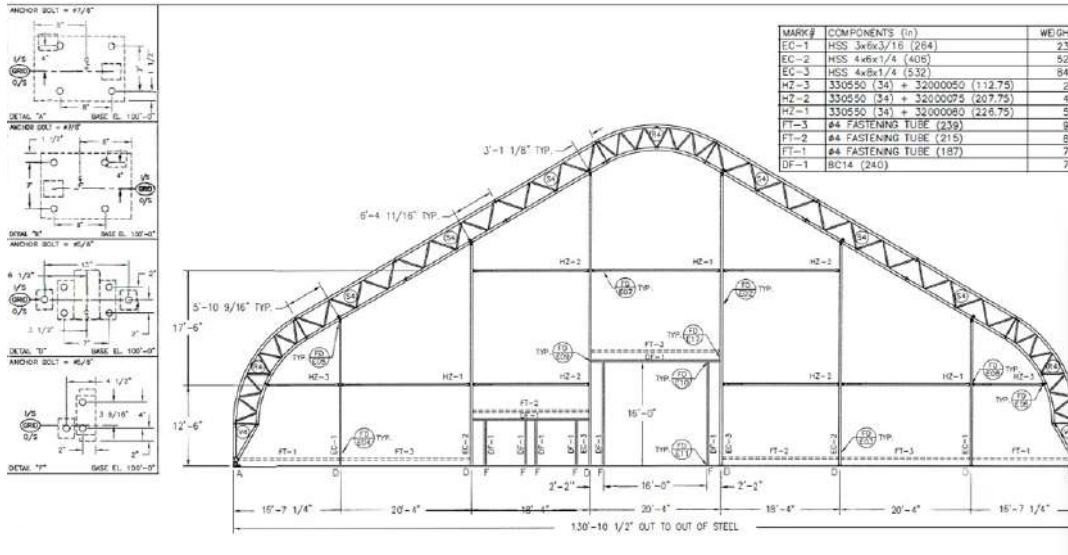

The equipment will collect the body surface temperature, display it in the panel, and judge at the same time. Normal readings will prompt the green light on and voice that the temperature is normal, and the over temperature would illuminate the red light and give intermittent alarm sound.

The temperature qualified user must open their hands to the bottom of the hand disinfection machine. The disinfectant automatically induces the spray into the palm of the hand to apply. The system also checks for a face mask if applicable.

After hand disinfection, you can enter the spray body disinfection channel and walk out slowly.

## In-Room and Venue Disinfecting Solution

**SAFE and NATURAL** 100 times more powerful than Chlorine Bleach.

Electrolyzed water is an all-natural, non-toxic, and non-hazardous solution that can be used for disinfecting or degreasing.

This solution is a powerful oxidant called Hypochlorous acid (HOCl) which is 100 times more powerful at killing microbial pathogens than Chlorine Bleach.

**A 100% safe and non-irritant.** Harmless if ingested by accident, it can be sprayed in to the air, on hard and non-porous surfaces, walls, desks, floors and more. It is found in our blood as one of the most powerful biological oxidants generated by our white blood cells.

There are over 300 published research articles on the disinfecting power of electrolyzed water.

Effective against SARS COV-2 the novel Coronavirus on hard and non-porous surfaces.

Kills bacteria, bacterial spores, viruses, and fungi 100x more effectively than chlorine bleach other hard chemicals.
